Results-driven professional passionate about creating innovative solutions and fostering collaborative team environments. Skilled in Python, Flask, Java, React, and database management. Strong analytical, interpersonal, and communication skills, with a commitment to continuous learning and professional growth. Seeking roles in Data Analysis, Product Management, or Software Development.

## EXPERIENCE

### Full Stack Developer

Bluefin Enterprises Inc

May 2022 - Current

- Retrieved and managed conversion data via Bing & Google API's
- Use of third-party applications and external APIs
- Developed and implemented web scraping bots using Python, Pyppeteer and Boto3, resulting in a 40% reduction in manual data processing time.
- Deployed a serverless application to automate SendGrid contact validation and uploads, improving operational efficiency
- Stored and maintained both external customer and internal data information using Airflow and PostgreSQL, enhancing data accessibility and security.

### Security Guard

Russel Security

May 2019 - September 2020

- Accurately logged incoming and outgoing shipment details, maintaining facility production.
- Conducted surveillance across the property, ensuring safety and security.

### Educator

Reptilia

December 2018 – May 2019

- Took Initiative to research and learn about reptiles, becoming an effective educator.
- Prepared and delivered engaging presentations to audiences of various sizes
- Organized and allocated merchandise during events

## PERSONAL PROJECTS

### Job Tracker

- Web application created with React, TypeScript, MUI, Docker, PostgreSQL and Netlify for deployment. This app well helps me keep track of jobs applied for!

### Brick Breaker

- My own implementation of the famous game Brick Breaker developed through Python & Turtle
